

# THE DARK SIDE OF DIGITAL TRANSFORMATION

On average, enterprise organizations work with over **5,800** third parties, and **200** third parties have access to the company's systems on any given day. As reliance on third party applications grows, it's creating more risk for cybersecurity teams to manage.

The vendor ecosystem is expected to grow **15%** year over year. That means, in three years, the average third-party ecosystem of an organization will be over **8,000** vendors.

**24%**

of an organization's new third parties and **40%** of current third parties remain unassessed.

## DATA WITHOUT INSIGHT IS JUST NOISE

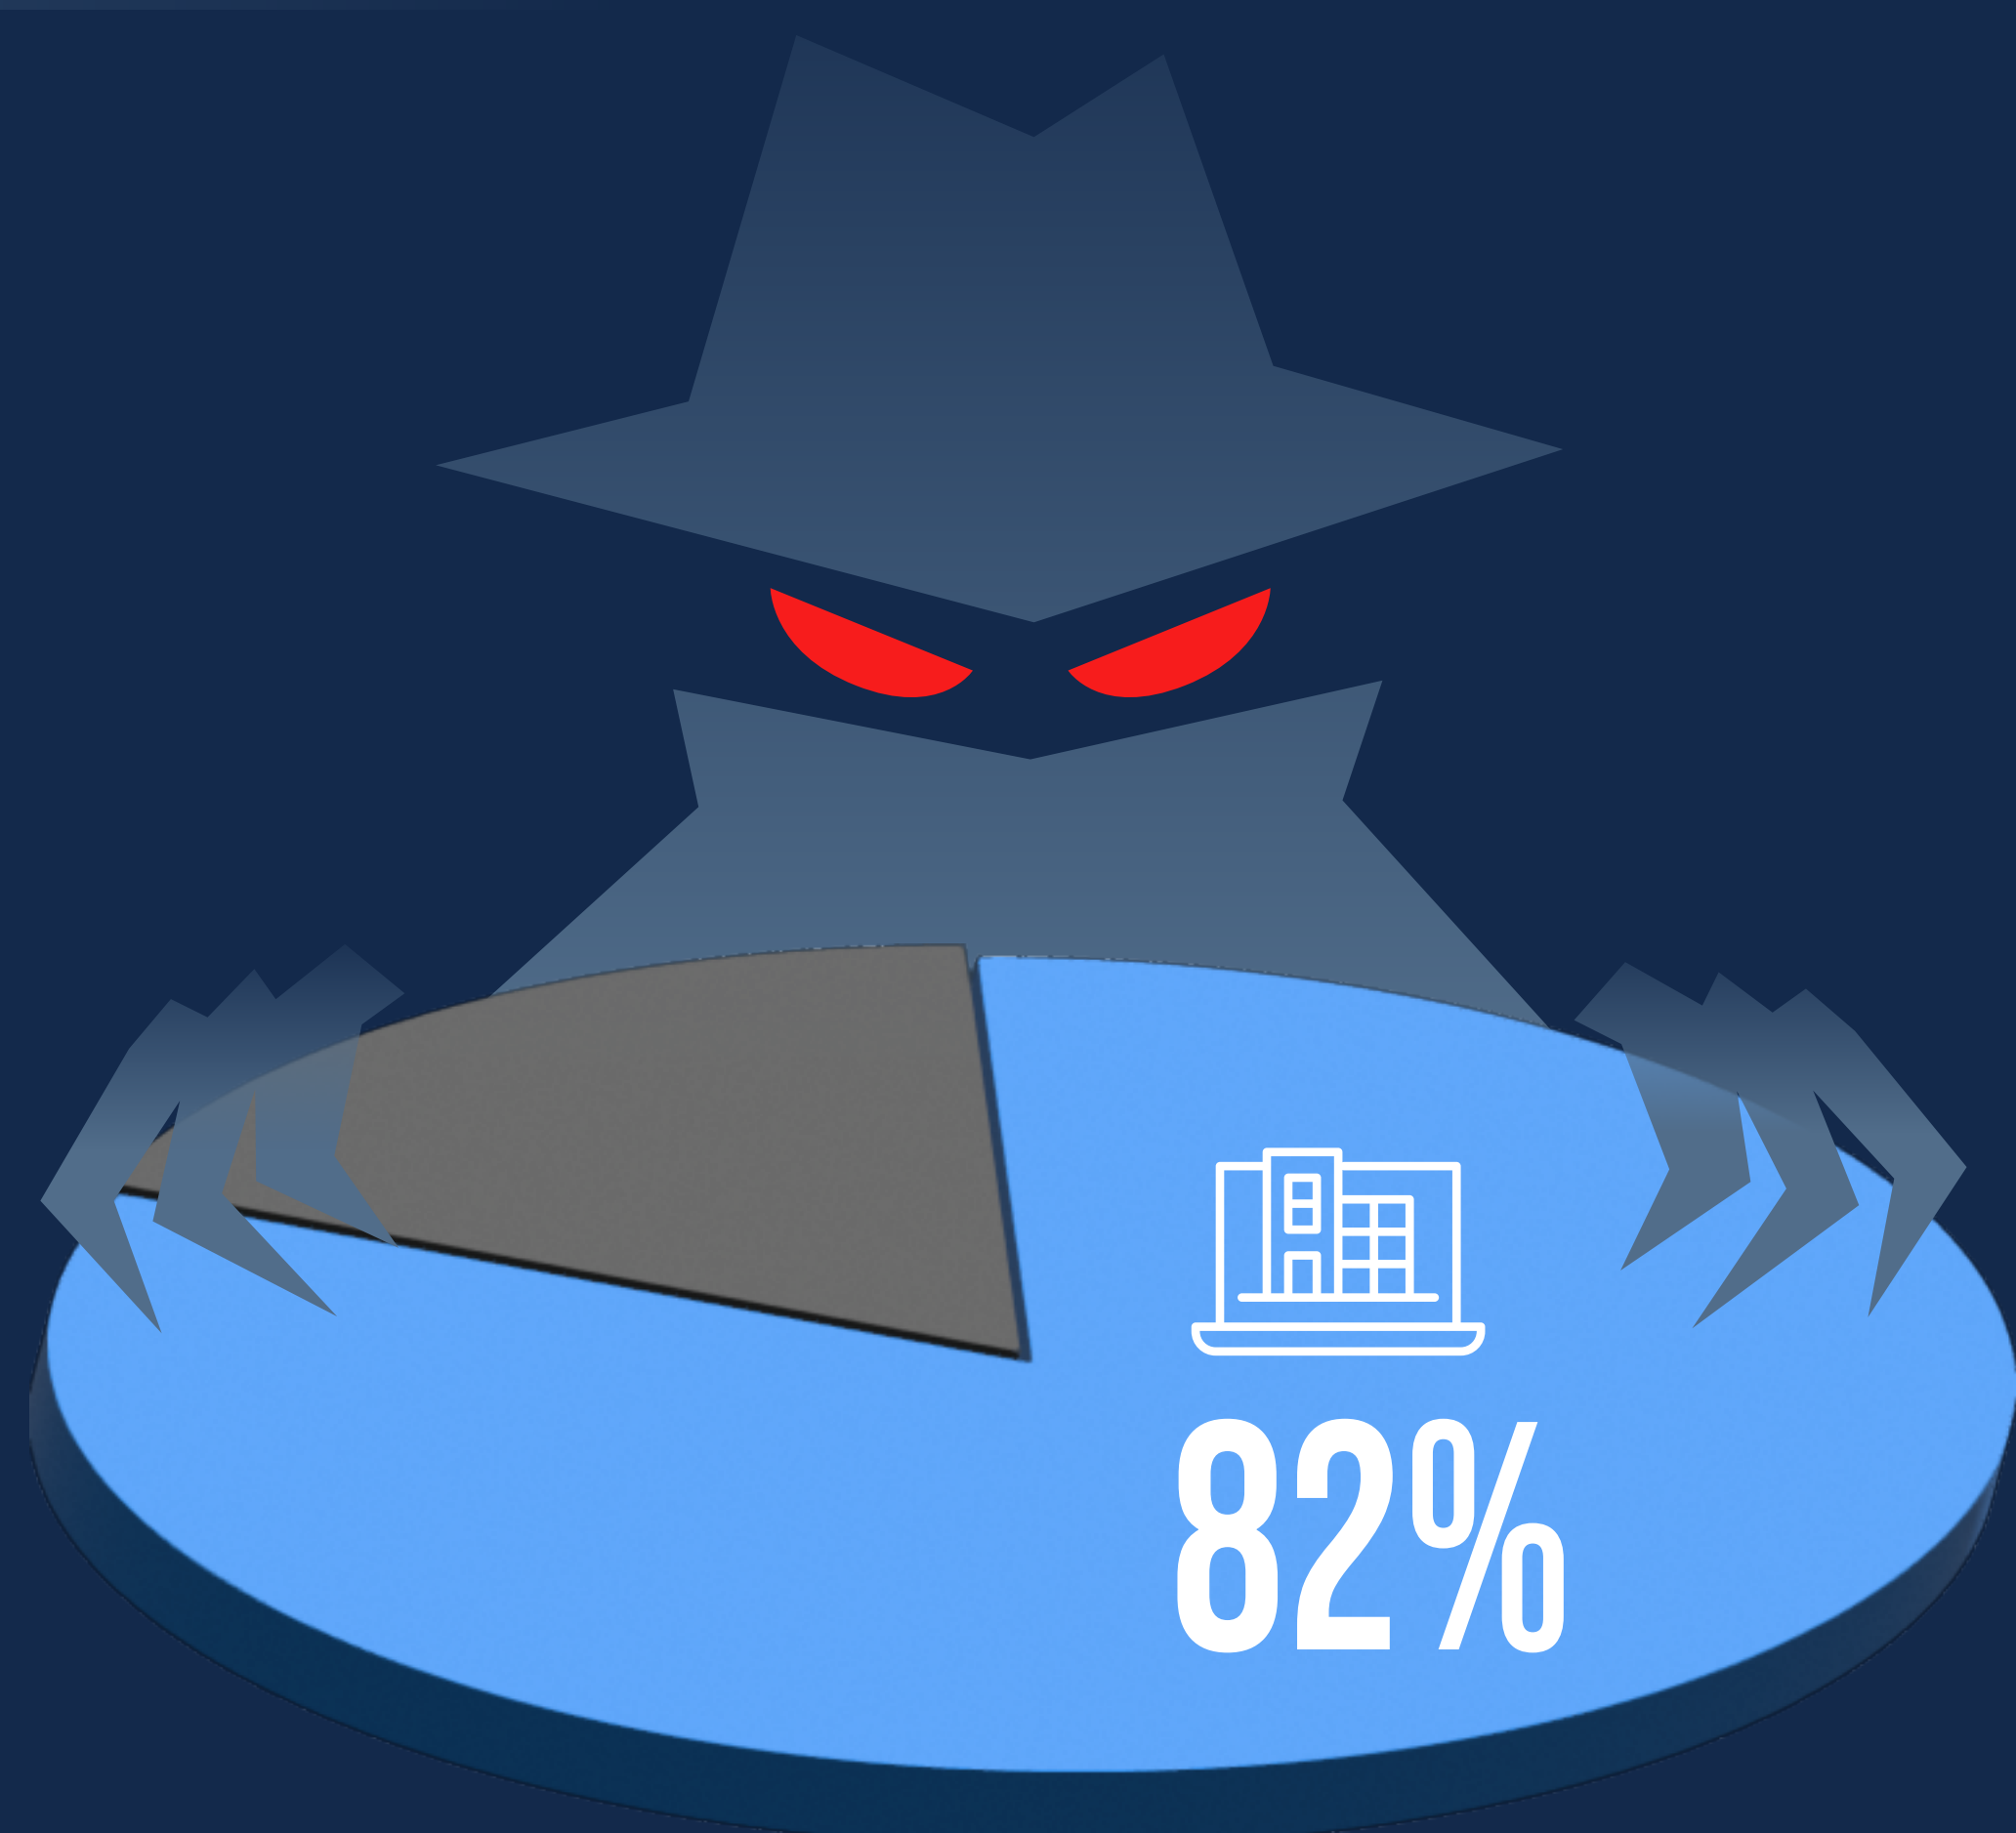

**58%**

of organizations do not have a proper third-party cyber risk management program in place.

**82%**

experienced at least one data breach stemming from digital transformation,

with **55%** of those organizations believing that at least one of the breaches was caused by a third party.

**15,000 HOURS**

are spent each year on completing third-party security assessments.

**CYBER RISK INTELLIGENCE SHINES A LIGHT ON THIRD-PARTY BLINDSPOTS TO HELP YOU PRIORITIZE YOUR RISKS AND MAKE SMARTER DECISIONS.**
